Pick PSA

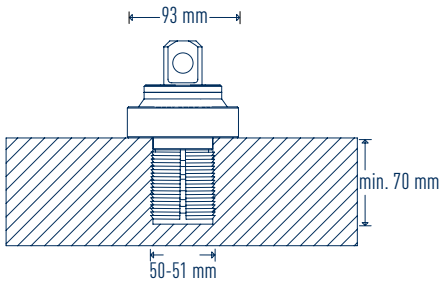

Pick PSA

SIHGA® Feature	YOUR Benefit
protecting yourself and your employees from injury does not get any simpler than this	choose Pick-PSA when selecting your type-B attachment point
if the wooden elements have already been lifted with the Sihga Pick, there are already sufficient holes available	there are no time-consuming issues with tangled cables as the next attachment point is always within reach
optimal cable lengths possible	enables secure movement without restricting freedom of movement
no time-consuming installation and deinstallation necessary	for maximum security, the Pick-PSA is simply inserted into the borehole and the safety screw is tightened to 3 Nm
no cumbersome scaffolding needed	saves time and money
versatile in use	applicable for beam ceilings and board locking slabs
made, developed and patented in Austria	Austrian build quality and reliability, robust heat-treatable steel for long durability
almost maintenance free	regular cleaning and visual inspections, as well as annual testing in accordance with operating material regulations (Arbeitsmittelverordnung) are sufficient
tested by TÜV Austria	ensures the highest level of safety
